

Legislators: Fardowsa Needs Your Voice

To Save New York's Home Care System from the **Disproportionate \$1 Billion Assault** by Governor Cuomo's Medicaid Redesign Plan

Ten-year-old, 63 pound Fardowsa has a quiet voice to match her small stature, but her character communicates a strong message about the power of the human spirit.

Fardowsa (pictured here with her home care nurse, Dea, of the Visiting Nurse Association of Central New York) suffers from a ventricular septal defect which causes severe pulmonary hypertension. Her physicians have recently determined that her disease has become irreversible and inoperable.

Fardowsa's home care allows her to live at home, improves her quality of life, and **saves Medicaid dollars** by keeping her out of the hospital.

Speak up for Fardowsa by standing up for home care. Reject the Governor's \$1 Billion Assault on home care and raise your opposition to the home care MRT proposals within your legislative conference.
